## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over US patent application publication 2002/0071,540 (Dworkin).

- As for claims 1, 4-6: Dworkin teaches a computer implemented system and corresponding method connected to a network server (figure 2) for managing a first service of distributing contents in real-time according to a reservation made in advance by a first terminal, and, to a second terminal for requesting the use of first service and the use of a second service of providing a chat space (0002-0008, 0015-0019), comprising the means/steps for:
  - acquiring means configured to acquire reservation information, sent by the first terminal, to the information processing apparatus from a reservation database in order to provide the first service (0015, 0025),
  - generating means configured to generate the chat space corresponding to the reservation at scheduled distribution start time designated by the reservation (0019-0021, 0025-0028),

authentication means for authenticating the second terminal by the use of authenticating data used by the server to authenticate the second terminal (0018, 0024), providing means for providing the chat space and the first service to the second terminal designated to be distributed by the first terminal (0024, 0025).

Although Dworkin teaches generating the chat space at scheduled time (0026), Dworkin fails to clearly teach that the chat space is generated at “predetermined time” prior to a distribution start time. However since the chat space must be available at scheduled time for customer satisfaction, Official notice is taken that it would have been obvious to one of skill in the art, at the time the invention was made, to implement generating the chat space at “predetermined time” prior to a distribution start time. Motivation of the implementation is for avoiding schedule confliction and overlapping.

Dworkin teaches means for viewing reservation, first and second tiers of authentication for protecting access to the conference room by others and allowing only authorized user to enter a reserved conference (0028), means for keep track user online or offline, means for automated calling and scheduling (0031). Dworkin fails to clearly teach sending distribution notice with authentication data to the second terminal. However official notice is taken that it would have been obvious to one of skill in the art at the time the invention was made, to implement sending distribution notice with authentication data to the second terminal for informing the upcoming reserved conference.

Art Unit: 2179

- As for claims 2, 3: The first service is a service for distributing contents sent according to a reservation made in advance, to the terminal in real-time (0004, 0008, 0016-0018), and the second service is a service for providing a chat space corresponding to the reservation for the terminal (0002-0008, 0015-0019).

### ***Response to Arguments***

Applicant's arguments filed 6/30/05 have been fully considered but they are not persuasive.

#### **REMARKS:**

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "the chat space is available coincident to a streaming distribution, both services being authenticated in accordance with authentication data provided to terminals in accordance with a reservation") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Per Dworkin, all participants are authenticated by the host ASP (0016-0018, 0026-0027).

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2179

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
